

# Operator Safety Acknowledgement Form

Each operator should read and understand the following instructions.

- I understand that while children are in the equipment, a responsible adult must be supervising and in control of the ride at all times.
- The ride should not be operated if wind exceeds 15 mph or in rain or lightning conditions.
- All riders must remove their shoes and any sharp objects before entering the inflatable. Sharp objects include eyeglasses, toys, jewelry, keys, or any item that could scratch another rider or the unit.
- Riders should be sorted by size. Only riders of the same size should be allowed in the ride at the same time. Please refer to the information plate provided on the unit. I agree not to exceed the recommended number of riders or weight limit.
- ABSOLUTLY NO SILLY STING OR SPRAY STRING OF ANY TYPE IS TO BE USED NEAR THE INFLATABLE!** It can severely damage the vinyl and you will be responsible for the cost of repairs.
- No food, drink, or gum.
- The operator should assist the riders when they enter and exit the ride.
- The operator should position himself/herself in close proximity to the entrance of the ride.
- While the ride is in operation, the operator should watch the riders at all times. No roughhousing, horseplay, somersaults, diving, wrestling, or flips should be tolerated. Climbing on the nets is not allowed. Anyone who does not obey the rules after being warned should be asked to exit the ride (operators should be made to understand that they are in control of the ride...and removing someone from a ride who is not following rules is important for all riders' safety)
- The operator must strictly enforce the rules posted on the warning sign.
- Safety and weather procedures have been reviewed with me.
- Keep children away from blower at all times.
- Emergency evacuation procedures in case of unit deflation have been reviewed with me.
- I understand that riders must slide in a sitting position, feet first. Jumping and flipping from the top of the slide is not permitted and can cause injuries.
